could not disappoint the little gardeners.

Each child brought a Times-Dispatch
free seed coupon, filled out with his or her
name and address and these coupons have
been filed so that the committee from
the Civic improvement League which will
visit the various gardens and award the
sixteen prizes will overlook no one.

Miss Pegram was greatly pleased with
the behavior of the children, who were
orderly and quict, and who seemed to
appreciate the endeavor that The TimesDispatch is making to give pleasure to
the young folks and beautify the city.

Secretary Shaw Says Movement Will be Made to Get New Tariff Law.

#### TO MEET HOSTILE POWERS

(By Associated Press.)
CLEVELAND, OHIO, May 20.—The fifth annual dinner of the Chamber of Commerce was held here to-night, with 300 persons in attendance. Leslie M Shaw, Secerteary of the Treasury, spoke on "Non-Partisan Statesmanship." said in part as follows: "I cannot believe that any country seri-

ously considers putting in operation a

revision of tariffs imposing new and se-vere discriminations against the people vere discriminations against the people of the United States. Such action would be most unfortunate from every point of view to both countries. Certain it is the United States has done nothing, and will do nothing, to invite such a course.

"If, however, any considerable number of foreign countries should unite with those now discriminating against us then there will remain for the people of the United States four possible policies. I have heard it intimated that an amendment to our present tariff laws is likely to be proposed at the next session (but with what prospect of passage I can not say), substantially as follows:

"Be it enacted, that whenever any country grants to the people of any other country privileges within its markets which are withholden from the people of the United States, then and a all such instances the tariff duties on all merchandise coming those countries showing such proferences shall be — per cent, higher than provided in the schedules of existing tariff laws.

"This would constitute a maximum and minimum tariff, the maximum to be enforced only against such countres as exact a maximum rate against us.

"I understand that those who advocate this course meet the charge that I means tariff war, with the susgestion that the United States will not first declare such a war. Being forced to follow the example of other countries is not the equivalent of a declaration of war, while yielding to the demand that the United States shall discriminate against thase who do not discrimate against thas who do not discrimate against thas who do not discrimate against thase who do not discrimate against thas who do of the United States. Such action would

not discrimate aganst her might in-volve neutral powers n a universal tariff war. Such a war would necessarily harm us, but it would harm more soriously still those who drove us into it. The United States prefers to reat all alike, and fully appreciates like treatment by others."
